

CampusGrid AI — system architecture and technology stack

Multi-agent campus energy decision support · IT 3041 Information Retrieval and Web Analytics · four agents, one orchestrator, REST + JSON over HTTPS

Agents sit on the internal network and are not publicly exposed. Agent communication: REST API + JSON over HTTPS, authenticated · MCP is optional, for agent-to-tool calls such as the simulation platform · A2A is a future option for interoperating with agents built by other vendors, and is not required for the system to be agentic
